

HEATY FILTRA ADVANCED

For cleaning the systems from dirt, solids and other deposits.

Including

- Stainless steel filter case
- Flow meter
- Shut-off fittings
- Removal tap
- 3x filter bags 1 μ
- Quick-release fasteners at the inlet and output
- Hose set
- Magnetic filter
- MagnaClean Professional2XP
- Hot water pump

These components are completely assembled on a large transport cart with rubber tires and stair skids.

Specifications

Art. no. 100453
Art. no. replacement filter 100451

Max. pump performance	4.800 l/h
Max. flow pressure	6 bar
Max. operating temperature	90 °C
Height / Width / Depth (appr.)	1.170 / 480 / 470 mm
Electricity connection required	Yes, for pump

Heaty Filtra Advanced

Why a filtration device?

Water that is free of dirt, suspended solids or other deposits:

- prevents clogging of pumps or heat exchangers
- promotes good heat transfer
- reduces material wear and tear
- reduces risk of germ formation

Your advantages

- ✓ High flow rates
- ✓ 1 μ fine filtration
- ✓ Easy handling
- ✓ Suitable for hot water
- ✓ Removal tap for checking in operation
- ✓ Quick filter exchange
- ✓ Connection for manometer

Please note:

The medium used must not be volatile (heating water up to 99 °C)
